

モルック

ゲーム説明

Slide 2 — What You Need

- 1 throwing stick → モルック
- 12 pins → スキットル
- Each pin is numbered **1 to 12**

How to set up the game

Arrange the pins in a **tight triangle formation** like this:

Place them about **3–4 meters away** from the throwing line (called モルツカーフ). Players stand behind the line when throwing.

Basic goal

👉 Be the first player (or team) to reach **exactly 50 points**

How scoring works (VERY IMPORTANT)

This is the key rule:

Case 1: You knock down only 1 pin

→ You score the **number written on that pin**

Example:

- You hit only pin **8** → you get **8 points**

Case 2: You knock down multiple pins

→ You score the **number of pins**, NOT their numbers

Example:

- You knock down 3 pins → you get **3 points**

5. After each throw

- Any pins that fall are picked up and **stood back up where they landed**
- This means the pins spread out over time

6. Turn order

- Players take turns throwing
- You can play:
 - **1 vs 1**
 - or **teams**

7. Winning rule

- You must reach **exactly 50 points**

Special rule if you go over:

- If your score becomes **more than 50** → your score goes back to **25**

Example:

- You have 48 points
- You score 4 → total = 52 **✗** → your score becomes **25**

8. Missing throws rule

If a player **misses completely (hits nothing)**:

- 1 miss → OK
- 2 misses → OK
- 3 misses in a row →  *you are eliminated from the game*

9. Throwing rules

- You must throw **underhand** (like bowling)
- The throwing stick must be thrown (not slid on the ground)
- Stay behind the throwing line

Quick summary

- Throw the stick → knock pins
- 1 pin = its number
- Many pins = count them
- Reach exactly 50
- Over 50 → drop to 25
- 3 misses → out
